# WP2 Stakeholder forum on dissemination

*Plenary Assembly meeting and Stakeholder forum*  
Tuesday 24th March, Madrid

**WP 2 Presentation**  
Zuzana Matlonova  
Ministry of Health, Slovakia

Judith van den Broek  
European Health Management Association

Funded by  
the Health Programme  
of the European Union

# Stakeholder forum - agenda

## The aim of the Stakeholder forum:

- Share the knowledge with the stakeholders
- To lead the dialogue
- To come to the conclusions addressing Joint Action activities and challenges leading to improvement of the performance

## Knowledge feed:

1. The brief summary of the last Stakeholder forum in Bratislava
2. Stakeholder analysis results - qualitative analysis
3. Knowledge Brokers Network as essential supporting tool for dissemination and stakeholder's network

## Stakeholder working groups: Explanation of the break-out groups

# STAKEHOLDER FORUM IN BRATISLAVA

(brief overview)

## Stakeholders' involvement in the JA EUHWF

- Direct participation in one or more WPs
- Participation in the knowledge brokers network
- Participation in the Plenary Assembly meeting
- Participation in the Stakeholder forum

## Stakeholder analysis

- 4 steps in achieving quality stakeholder analysis
- the results of the national stakeholder analysis
- challenges for the future in terms of further conduction of SKD analysis

## Working model for the professional knowledge brokers

- professional knowledge broker network and the Joint Action relationship

## Discussion

# STAKEHOLDER ANALYSIS

(qualitative data - preliminary results)

*Data: 110 respondents*

LEVEL	DOMINANT MOTIVATION
Political level	<ol style="list-style-type: none"><li>1. Access to expertise, knowledge</li><li>2. Data collection, access to data</li><li>3. EU strategy to guide national strategy</li><li>4. Collaboration, exchange good practices across EU</li></ol>
Strategic level	<ol style="list-style-type: none"><li>1. Collaboration, exchange good practices across EU</li><li>2. Access to expertise, knowledge</li><li>3. Data collection, access to data</li></ol>
Implementation level	<ol style="list-style-type: none"><li>1. Quality of care (quality professionals)</li><li>2. Access to expertise, knowledge</li><li>3. EU strategy to guide national strategy</li></ol>

# STAKEHOLDER ANALYSIS

(preliminary results)

- **Similarities across levels**
  - Access to expertise and knowledge
- **Differences across levels**
  - Political and strategic: collaboration and networking, data collection  
Implementation: quality of care, improvement (e.g. training focus)
- **Further, in-depth analysis needed**
  - Differences might imply that different communication and dissemination strategies are needed

# KNOWLEDGE BROKER NETWORK

## Plans for the future:

- Continue with meetings
- More feedback on deliverables of JA, responses to requests of WPLs

## New series of webinars:

- feedback and suggestions on the network management (country and professional)
- exchanging information: up to date
- feedback, recommendations, discussion based on deliverables
- Invite WP experts to present important deliverables
- Facilitation of country progress in implementing planning methodologies
- Use meetings and network to disseminate country developments and progress

## Points of attention:

- Reaching out to professional organizations
- Sustainability of network & development and support of national platforms

# DISCUSSION

- participants will be divided into 4 groups
- each group will receive 2 statements to discuss
- every statement includes supportive questions to feed the debate
- there will be one facilitator, one note taker, one time keeper and one speaker appointed in every group
- total time for this exercise is 45 minutes (20 minutes for each statement + 5 minutes for summary within the group)
- at the end of the group discussion session, the speaker will present the results to all of the participants

**The aim of this discussion is open debate: „think tank without limitations“ in scope. Participants are encouraged to speak openly and freely on the proposed statements.**

# STATEMENT 1: Communication and JA content

**“The communication and dissemination of current deliverables is sufficient.”**

Supportive questions:

- 1) How can communication with regard to specific deliverables be improved?
- 2) Do you think that stakeholder target groups should be identified for each specific deliverable? How? With the use of what means?
- 3) What dissemination tools (innovative) would you suggest to foster the dissemination of the JA deliverables?
- 4) Would it be helpful to organize webinars by particular work packages to communicate work package results and present approved deliverables?

## STATEMENT 2: Communication and involvement of stakeholders

**“The European professional organizations can support the national level organizations and their constituency organizations in disseminating JA deliverables and its use in practise.”**

Supportive questions:

- 1) How can communication with regard to specific deliverables be tailored to different stakeholders (e.g. country level and professional organizations – european and national)?
- 2) Would the merge of In-country and Professional knowledge broker network empower the stakeholder activity and interests towards the JA results?
- 3) Do you have experiences of similar kind from elsewhere? (different project or some other joint initiative)
- 4) Can professional organizations facilitate the development of in-country platforms?

# Thank you!
