Paolo Michelutti is expert in human resources management and organisation in the Health sector.

In these matters, he works as a consultant and trainer, also at Age.Na.S., the National Agency of the Regional Health Services. He is currently involved in the Joint Action "Health Workforce Planning and Forecasting" as a project manager of the Work Package 5, led by the Italian Ministry of Health.

**Presenting:**

Learning from the existing planning systems: presentation of the Handbook on planning methodologies

**Summary:**

The Planning and Forecasting of Health Workforce is a complex matter and the EU context has its own features. In the framework of the Joint Action "Health Workforce Planning and Forecasting" a Handbook on planning methodologies has been produced.

This Handbook is based on seven selected experiences across EU member states and contains a deep analysis of the key elements of those planning systems and a collection of good practices. The aim of the handbook is to support EU countries and regions to improve and develop their own Health Workforce Planning methodologies with special regard to the quantitative approach of the forecasting tools.
